

Health Informatics

Certified Patient Account Representative (CPAR)

9TH & 10TH GRADE

PATHWAY OVERVIEW

Throughout the Health Informatics Pathway, students learn the practice of acquiring, analyzing, and protecting digital and traditional medical information vital to providing quality patient care. Health Informatics combines business, science, and information technology. Students learn the importance of quality, integrity, and protection of patient's health information. Students learn about the latest information management technology applications, as well as the workflow in any healthcare provider organization from a large hospital system to the private physician office.

Course 1: Introduction to Healthcare Science

Course 2: Essentials of Healthcare

Course 3: Health Information Management/Medical Office

This pathway includes use of the American Health Information Management Association (AHIMA) Virtual Lab, which simulates hands-on experience in a healthcare environment.

REAL WORLD OPPORTUNITY
