Project-based Learning & Problem Solving

GROUP-UP

Real-world problems require creative solutions. At the 4C Academy, teams of instructors and students work together to understand the needs of our community and develop innovative solutions to meet those needs. Through our Group-Up initiatives, we aren't just learning what needs to be done; WE'RE DOING IT!

Group-up: ADOPT-A-STREAM

"The Scientific Research class recently adopted the local Lower Flint Watershed, our specific spot is located right along the River Walk at Turtle Grove Park in Albany, GA. This experience not only enables the students to explore their interests but also help increase their awareness and instill the desire to become environmental champions in our local community."

-Virginia Kirima, 4C Science Instructor

Stand alone projects:

- Gather-Up- canned food drive
- Adopt a Stream
- Recycling
- Renewable energy
- Robotics in the real world
- Patient care- Improving communication

Projects in *The 4C Gardens*:
